The President &c.a Members
of the Board of Revenue

Gentlemen

I beg leave to send my report on the district of Dindigul – the conquered Districts South of the Noil and the province of Madura – the Dehwar accounts of the two latter are also sent –

2 . . . . The indisposition of my Cacha /Dysentery/ particularly and generally for these last four Months has prevented my being earlier in the transmission of this report – and I am sorry to say its continuance is likely to cause further delay –

3 . . . . The report on the Madura Church lands and on the alienated & Mortgaged lands is nearly done the intricacy of accounts necessary to the investigation has been the chief reason of its present delay – that difficulty

is now overcome and I hope a very few days will shew it to your Board-

4 - - - - - - - - In the course of twenty days I hope to send the Zemindaries of Dindegal prepared for permanency - and I hope they will shew your Board - I have not spared any attention - that in its application could promote the Success of the System -

5 - - - - - - - - I wish the present Moyen-zabita to remain I will reduce it as circum=stances may with propriety direct - at present it is unpractticable. My letters of the 22 March 11th April 1800 and 26th November 1800 fully evince the want of Public offices as well in the talooks as for the superior Cacharee.

6 - - - - - - - - Circumstances as related in those letters have varied for the worse and the extreme insecurity of the Public treasure! tho in the lower fort and under

a

as native officers guard - in a room which was granted to me / to the inconvenience of the Commissarys Department / which is not Capable of giving shelter to any thing against the weather - is the cause of much anxiety and makes me very solicitous that your Board will be pleased to direct such steps to be taken for the buildings necessary as may be proper -

7 - - - - - - - - - It is the great insecurity of every thing in the Talooks that makes a larger Sebbendy necessary - and I belive I assest with a great degree of Correctness that the Amount reduced expence of one year in the Moyenzabitan after the buildings I have noted in former letters have been erected will give a surplus to the treasury after paying the expences of the erections -

I.

1

I have the honor to be

with great respect

Gentlemen

Dindigul
20th July 1802

Your very obedient
humble Servant

Report on Dindigul District

Sir shewing the Comparative Statement of the Revenues of Dindigul for fuslees 1210 and 1211. It is with great satisfaction that I find myself able to bring before your Board an increasing Revenue in every Talook excepting those which suffered from the Rebellion of the Murdoos and of Verapatchee -

2 - - - - - - - - I shall not intrude the Dehwar details or any abstract - as the formation of the Zemindaries will include every minute detail and more necessary in explanation to the intended permanency than to this Report -

14. 3 - - - - - - - - The decrease on Nuttum is the consequence of the destruction of all the large

large Villages on the Eastern border, by the Murdoos and their adherents the evil admitted of none other remedy than time - I did not even think it necessary to apply for leave to Compensate by advances to the Inhabitants - as they were too much scattered after the burning of their houses to be gathered again to Cultivate for 1211 fusly and would therefore have been unable to have sustained any other burthin for that season, than what they proposed to themselves -

4 . . . . - Part of the lands of the Villages that were destroyed were rented and as the Inhabitants returned easy Cowles were given, the produce of which will this year most probably compensate the loss of the last year -

5 . . . . - In the decrease for Battalagoonta and Deodana putty - part is caused

caused by Ryots having left their lands and part by the levy of Woodcutters for Colonel Agnews Detachment which drew from their labour many husband Men and part is caused by lowering / from the Survey / the rates of certain lands which however will in the next fusli be very much increased on the Survey Cowle-

6 - - - - - - - - - - - - The decrease in Pylney has arisen from the Survey only - the three years Cowle given to Villages on the Survey has always equally and proportionably risen, from the first, to the third year inclusive - the Teerva on the lands that cause the decrease was _more_ than the proportion of the Settlement for the first year of the three entered in the Cowle - hence the decrease to give as near as possible a General equality this however will in 1212 fusly be amply compen

sated

sated to the Sirkar-

7 - - - - Of the Items composing the increase every explanation will be given in the report accompanying the Zemendaries. It is here unnecessary to intrude more than shew to your Board the total increase distinguishing what actually did belong to the Sirkar previous to 1211 from what in the last fusly become its adventitious right-

Vide Col. 5-8. - - - - - The Settlement for fusly 1210 was 138286-3-7

Col. 10 for - - 1211 - 152365-22-10

difference - - - 14079-19-3

Composing the Net Increase but of that net increase the increase on the Revenue by the assumption of the Verapatchee pollam after deducting the former Peesh=

Vide Col. 13 =cush appears to be 10756-24-13 which deducted from the total leaves 3322-26-70

as the proper net Increase of the Sirkar Talook this appears little but Reference is also to be had to the Condition, Nuttum was last year reduced to by the Rebels-

9 This Talook there was every reason to suppose would as before have exhibited a very considerable increase- had not rebellion prevented it but taking it as it was previously to its being plundered and desolated, the present decrease on it amounting to S P 2241 f 37 c 54 would have been so much in addetion to the Jumma and had not the necessity of preserving equality on the Survey proved the propriety of the trifling reduction on the Pylncy talook to the amount of S P 1270 f 25 52 the increases might have received as it

it will and yet further in the Current fusly

the increase of these two Items making 3512-21.20 [superscript: c f c]

which Joined with the Ain talook Increase 3322 36 70

makes--6835 16 16

and which all considered may be looked upon as the proper increase exclusive of Verapatchee which has increased to the extent noticed the Sirkar revenue without any direct exertions of the Collector-

10 In the Dindigul Syr a small increase has taken place which but for the exemption of duties on grain would have been very much more and this exemption will in the present fusly still more materially affect that branch of Revenue-

11 I have in the present Jumma

bundy

cundy made not any alteration in the Mana-
para or Dindegul Poligars the latter are
now all with me and I have partially settle
with all save two on the permanent System
the Increase is great some few alterations
will be necessary but I belive I am war-
ranted in saying the individual Pollam
increase will appear from 24 to 1000 ℘
Cent and that the General average ℘ Cent
increase will equal 112 ℘ Cent on the pre-
sent Jumma

12 It is not in this place my
intention to comment on the improved and
improving state of this Province the State-
ment for the Zemindaries will shew it but
I cannot help adverting to one very strong
fact in proof of its present prosperity and
which

which the accounts will exhibit Viz the difference between the Gross and Nett Revenue of fusly 1205 and the present fusly 1211

13 A variety of causes have produced the difference which are already on record and it is not my wish to depreciate the Management then obtaining in composing it with the greater resources the Sequestration of the several Pollams gave to me but the nett Revenue in Dindegil in fusly 1205 was Star Pagodas 28817-2-61 and in fusly 1211 was Star Pag. 130525-8-7 exclusive of the Amount grain on hand not sold equaling 7735 7 79 and which as collected may with propriety be brought in to the account

14 If it be objected that this

8

this comparison be improper I will take the average of the six years the Revenues of this Province have been entrusted to me and on reference to the Accounts this average will give ℔ Annum an equality to Star Pagodas 101175. 37. 75 being an increase of about 250 ℔ Cent on the Nett Revenue of fusly 1205 the Pollams save those sequestred paying the same pushcush as in that fusly-

15 - - - - - - - - And this comparison is made including the increased Sibbendy of the Dindigul district for its protection against the Colleries and other depredators and including from 1209 the increase of the Huzzoor Cacharee caused by the addition of the Conquered Countries South of

of the Nozib and which was not exclusively
Charged on the Resources of those Countries-

16 The Comparison of the average
six years Gross Collection with the Gross
Revenue Collected for 1205 gives nearly
240 ℘ Cent increase- the Amount average
giving about Star Pagodas 139124 8 4
and the Gross receipts in 1205 being
41303 7 74-

17 I will not detain your Boar
longer on the Subject of Dindegul than
to say the district has been Materially
improved is now improving and highly
Capable of further improvement and that
the permanent Settlement of it whilst asu
ring a right in perpetuity to the Cultiva
-tor will be much increased above tho

Summa

Jumna for 1211 Fusly.

18 . . . . . . The tranquillity of this Country has since January been undisturbed. the Collections have been made without a Check or even a Murmur, every thing at present promises well for the future and I trust the Zemendaries now formed when inspected by your Board will amply shew the Ryots that in the Regular and as far as practicable equalized assessments of the Land Revenue the Sirkar whilst fixing its sure demand has attended in every Respect to the Comforts of the inhabitants —

Report on the Districts South of the Noyil

Vide A — In this Statement Comparative between the year 1210 and the Current years Jumma of the Conquered Countries, I shall shew in Abstract the decrease and the increase of the Revenue on these districts - Referring your Board to the Dehwar details for such further explanation as may be requisite on the Subject -

2 — The settlement for 1210 is exhibited including the Sibbendy according to the talooks as arranged for that fusly and the deductions on account decrease are noted under two distinct heads on

Vide Col. 1

Vide Col. 2

Col. 3 A

: lands

lands given up by Ryots or neglected on account of death which needs no other explination and on lands of Ryots whose Cultivation has been impeded and lessened wholly by the A unfavorableness of the Season.

Vide Dehwar details

Vide Statement D

Vide N 2 B[d] details Dehwar & Assomever in report dated 16th march 1800.

3 The Dehwar details specify the extent of both these decrements on the particular villages but as the Village Podoppa in the Darapoor Talook was sent as the example of elucidation of my former report on these districts. I have again reverted to that Village and its hamlets to shew the decline of Cultivation on those lands which formerly exhibited an encrease.

4 - - - - - - The Statement is of itself explanatory from fusly 1209 to 1211 inclusive and the remarks thereon are sufficient for

13

for connection with both the present Abstract and the previous detail, as well in respect to the Mozawar as the Ryotwar Statement-

5. . . . . . . The Reasons assigned by the Nautamcaur and Curnums and the details given in of the Cultivation by the Curnums, made it appear that the decrease in the Poonjee owing to the unfavorable season was until the 15th Caurtekai (or 28th November) to the full amount of what

Vide Cl. 3 A was reported which added to the decrease on lands given up made a total alarmingly deficient and portending much distress to the Country-

6. . . . . . . The Exertions of the different tahsildars and the disposition of the inhabitants favored by locality had in some

Vide Cl. 6

Villages

Villages caused an increase of Cultivation, this
tho' little Compensation in Comparision with
the deficiency on the high dry grain lands
shewed a Spirit of industry in the Ryots that
persevered against the season and gave a
proof that the spirit of agriculture was
still active

7 . . . . On the decrease however some
Vide Co. 8 deduction were necessarily made for the Cul-
tivation that was subsequent to the 15th Cartika
(or 28th November) these also are detailed in
the Dehwar accounts and form a consi-
derable reduction of the expected deficiency.

8 A further deduction of Reve-
Vide Co. 10 nue arises from the decrease price of Grain
on the Various measures used in the dif-
ferent districts this has resulted as well
from

from the reduction of price on account of full Crops on the Nunjee lands as from the exemption of duties on Grain - and the uncontroled liberty the farmers have of selling as they please

9 . . . . . . When these Countries were taken the Khodadad Sirkar had fixed a price for grain having held the Nunjee produce in Aumanee much higher than was ever paid for it excepting by those on whom it was imposed, all Sibbendy were usually paid two parts of their Wages in Grain and one part in Money

10. - - - - - Another and more oppressive way was to force at the Sirkar price grain on the Hurtucks of the different Villages which act itself was called (Cuddaugum)

Literally meaning Compulsion (Cuddauyem) by the Merchants who were compelled to take it and which grain was usually sold by them at near 50 ℘ Cent less.

11 - - - - These oppressive measures however were insufficient to dispose of all the Sirkar Grain a large quantity was always remaining and this arbitrary Management originating in folly always inded in loss as the Amuldars would suffer the grain to rot rather than sell it at the bazar price - the difference between their fixed price on the total amount Cullums - and the Amount quantity either rot unsold or not disposed of was added to the balances on the Country which continued yearly accumulating

It

12 - - - - - It is very probable that the Sultans orders must have been the cause of these absurd measures as such balances on the Country could not have remained and increased had there not been reasons originating in his will which his Servants below the ghauts were not privy to -

13 - - - - The difference of price on the Grain as settled by the Khoda dad Sirkar and as now Settled probably equals the apparent loss incurred in the Sultans accounts but the farmers are unrestrained as to their Sales their Lands are productive to themselves and their means of export tho' yet Confined are greater than formerly -

The

14 - - - The increase and decrease of

Vide Cd. 13. 15 the Money Collection arises generally from the Changes in loss or addition to the various heads composing the Sonardyem in the different talooks - the talook of Delli is however apparently great in its decrease in comparison with the others -

15 - - - This arises from the following abstract detail having been entered as with the Poligar Government under the head Sonardyem rather than the Iyacut and which is divided into three heads - Viz.t Bullawary being ℔ 696-5-12 which signifies in the Pollam a very favorable tribute at which rate had the lands remained the possessors would have been

been highly favored - 2^d the Tyrnal warry or assessment for the God Amounting on these lands to 295-8-12 - 3^d the Dorawarry or tax for trifling presents from the Peons to the Poligar from these lands being 160-6-9

16 - - - - - The total of these taxes amounting to 1163 - 1 - 1 are now a deduction rather than a loss as they are in the present Jummabundy entered in the Ayacut to which under any regular assessment they ought always to have belonged -

17 - - - - - The remaining Items composing this head of Revenue as containing nothing particular require not any explanation - the encreased arising Chiefly from House and loom taxes and from productive trees in topes which were before

before improving

Vide Col. 19. 18 - - - - The Kham Jumma for 1210 appears to have been excluding Sibbendy

Vide Col. 18 335463^{ct} 3^{f} 10as exclusive of the Pushcush but deducting the Sibbendy and adding

Vide Col. 20 the Pushcush of those Pollams which were

Vide Col. 22 afterwards assumed it Amounts to $33848^{c\,ct}$ 9^{f} 8as

19 - - - - It is to be remembered that the Pushcush only of the Pollams as entered here and Subsequently assumed was debited in the Jummabundy the excess of Collection after the defeat of the rebles was brought to account in the Sewoy Jumma.

ie Col. 21. 20 - - - The Kham Jumma of the Pollams is entered according to the Curnums Accounts and includes the Collection previously

= ously made by the Poligars it is entered
for elucidation of totals rather than expla-
nation of particulars.

Vide Col. 23 / Vide Col. 19 and / Vide Col. 21 to / make the total — 21 Hence the Kham Summa appears to be inclusive of Sibbendy (C. Chuckl. f As) 378805. 8 10 from

Vide Col. 24 — which I proceed to show the total decrease — as the Abstract of what I have before

Vide Col. 4 — remarked on the totals of decrease on land

Vide Col. 10[2]

Vide Col. 13[3] — rent, of decrease on the price of Grain[2] and of decrease on the Sonardyem[3] Compose the

Vide Col. 25 — Grand total of 64926-2 12½ leaving (Chuckl. f as) 313879-5 13½ as the Kham Summa of 1211, to this however must be added the inadequate compensation in the increase

Vide Col. 6 — on the land rent. in the increase of the subsequent Cultivation and in the increase

Vide Col. 8 / Vide Col. 15 — of the Sonardyem[2] making a Total of

Vide Co. 26 — of 22924. 4. 12½ to be added to the above

Vide Co. 27 — mentioned Summa making it Ch. 336804. " 9¾

22 . . . . The heads of the additional Sum

Vide Co. 28, 29, 30, 31, 32, — ma sufficiently explain themselves the Lands composing the produce entered are included in the Villages to which they formerly were attached and the variety of taxes impro perly added to the Syer have been put on that branch of Revenue to which they properly belong.

23 . . . . The next branch of Reve-

Vide B — =nue to which I beg to call the attention of your Board is the Syr that the causes of increase and decrease may be explai

vide Co. 1 / vide Co. 2 — ned. The Summa of 1210 was ch. 25086. f. 6. a. 8. and

vide Do. 5 / [illegible] 2 — the Ain Increase 775 " 8½ the incidental in=crease from the Assumed Pallams is ch. 1350 making

the

33 18

vide Coᵉ 8 — the total 2125 " 8½ (bb. ₰ a) thus added to the for-

Coᵉ 25 — mer Summa gives the total of 27211 7 ½

Vide Coᵉ 3. 6 — exclusive of the totals of the Stulaputra

which totals if added would make the

Vide Coᵉ 11 — Grand Total 27852 - 5 - 12¾ -

24. — The heads of the Colums

Vide Coᵉ 9 & 24 — noting the addition and substraction of

the Stulaputra are sufficiently explained

and as each in account balances the other

need not further Comment in this place the

seperate Talooks to which in addition or

Substraction all sums under this head

respectively refer appear distinct each

from the other.

25 — Hence the total Settlement

Vide Coᵉ 25 — for 1211 appears 27211 7 ½ (bb. ₰ a) giving the

Vide Coᵉ 8 — total increase of 2125 " 8½ (bb.) as before noted

but

but from this total the Stulaputra of the Devastaunum must be deducted as that head was improperly included in the Summa of 1210 but is not now entered in the addition the amount will be credited the Surkar in the Sewoy Summa.

26 The further apparent deduction of Stulaputra is a transfer of heads of Revenue to the branches to which they properly belong and appear in the increase of the Sorardyem in the former abstract the other Column explains itself and the Remainder after these deductions including the Syr of the Pollams appears to be 23402 .. 1 — (bbti f. a.)

Vide Col.e 27

vide Col.e 32 Statement A

vide Col. 28

Col. 30

27 The Comparative Statements unites the two General Statements on which

Vide Statt. C

which I have remarked and Shews suffi
ciently for the present the increase and decre
ase of the pollams, a further cause of
decrease however, yet remains to be
noted in the total Revenue in the dif-
ference of exchange, as existing in 1210
and as directed to be established by
your Board under date 21st December 1801.

28 The difference is as follows—

l 1. The Statement of 1210 was - 374396-6-3 or 316949-21-6

Ditto of 1211 at the Period ofrevious to the alteration of the Counteray Exchange which then was 118-1-4. 8967-2-11 or 7591-14-15 at 119-1-4 ₱ct as ordered by the Board — 361718-5-10¾ or 303709-39-70

2. 352751-2-15¾ 296118-25-61

Hence the ain decrease is at 119-1-4 ₱ct 12678-8¾ or 10642-27-8

and

and the decrease by alteration of the Exchange as follows -

On the Summa S.P. 296118 f. 25 c. 61 exclusive of the Sums collected on this Sy. at the former rate of exchange appears one Cuntersy Chucrum p% Pag. making a Sum equal to	2961-1-13½ or 2485-32-57
Col. 5 and on the total decrease of S.P. 13239 f. 23 c. 68 is - - -	132-4- or 111-6-3
Making the Sum - -	3093-5-13½ or 2596-38-60
which added to the ain decrease	12678 - 8¼ or 10642-27-8
Col. 5 Gives - - - - - - - - - -	15771-6-5¾ or 13239-23-68

As the total decreas-

Para 68 in Report 16 March 1800. 29 - - - In my former Report on these districts I noticed my intention of examining the Cultivation and State of

of the Ryots according to their Cowles, I intered on the investigation but was not able to perfect it the Cause of this inability arose from the unsettled state of the Country in consequence of the instigations of the partegans of Dondiah and the Poligar intrigues or threats influencing many of the Ryots of the Sirkar Villages-

30 These had scarcely subsided when the Poligar confederacy began its operations and the events from November 1800 to December 1801 admitted of little time for the completion of what was so much to be desired-

31 The investigation was not however neglected, and although the result of it will appear more in detail in my subsequent report on these Countries I cannot help

help observing to your Board that the result of fifteen years account during the Government of Hyder appeared to favor the opinion I had formerly Ventured to Mention Viz that altho ugh the then Summa would be collected I felt convinced it was too high to cover all the benefits Government might expect from the System of Permanency.

32 The total of these accounts varies little in its annual amount and although the present Summa chiefly owing to the Season is less than it ought to be the difference between it and the Average of the fifteen years before mentioned is very trifling.

33 This statement commences in 1774 and is continued to 1788 from which time that is from Keelok altho' many

and

39.71

and apparently very increased account Settlements have been made, not one actually Settled Jumma was ever collected - the present Season has been more favorable to the Country and from present appearances an increase may be expected - but when the Poonjee lands bear so much greater proportion than the Nunjee in the total as in these districts the effect of the season will of course be much greater on the Revenues than this cause not noticed might have been expected -

34 From every information I have of the State of the Country together with what has come under my own inspection I have every reason to suppose a General improvement, the restless Gours appear now to be

be quiet - the disarming of the Country has turned the minds of the inhabitants to business more proper than the predatory conduct they were used to and every thing promises fair for future prosperity -

Second Report on the Madura Province.

My Report on the Madura Provin
(? what year)
dated 28th January Shewed in the Abstract the
total Settlement for that province for the Cur-
rent fusly and detailed such information as
was then in my possession and Generally
necessary to be noted to your Board

2. The present address is to shew
the distinct Villages and lands on which
the Settlement was made; to shew all defe
differences, so far as the Accounts may admit,
reduced to a plain Statement; and to
explain the Causes of decrease and increase
on the several heads of revenue—

That

3 That the explanation may be more minute I have with great labour drawn out Dehwar details of the different talooks and connected the whole in one General Abstract I lament the details should be so Voluminous and so out of size but I could not reduce them or make them less brief with the hope of rendering all plain and prefect

Vide Statement A

Col No 12

from Col 3 to 16 inclusive

4 - - - - - The abstract shews the Total Iyacut as taken from the Accounts of the Curnums and rated under the measurement which they alledge to have been customary from time immemorial, from this the necessary deductions (as each distinct head will explain) are made, and the remainder is detailed in abstract as settled - the more specific

specific accounts of which may be seen by reference to the Dehwar details.

Col. 17. 18 5. - - - - - - The rents on the Betel Gardens have not in any respect been altered from what they were under the Nabobs Government- The difference in the value of each Chay in the different Talooks has arisen from the better situation of the Gardens for the Consumption of their produce, which in Maudcollam is much Superior to all others,-

Col. 19. 20 6 The number of Chays under Cultivation of Grain is, as Stated by the Curnums. And, in those Villages that could not be Settled at the Money rent, as noted in my former Report, the Mamool proportion of Grain was agreed upon, and is with

Vide Para 7 Report 28th July.

Co. 21 a small money rent the proper rent for the Nunjee of those Villages it is opposed to in the Dehwar accounts.

7 The total charges cultivated

Co. 23. 24. 25 according to the Curnums accounts were, by the information of the Inhabitants of the different Villages, of Measures Varying much from each other. It became necessary, therefore, to ascertain, as exactly as possible, the relative proportion of all to some Standard, in order to find whether or not the settled average Value ꝑ Chai was proper as well for the Sirkar as for the Ryot.

8 - - - The difficulty in doing this has been very great; and what is now submitted, as the result, is, altho the fullest

40

58

fullest information that could be got, not so correct, as to warrant me to say, that it is exact. A reference to the Scale of Measurement, as adopted by each Village, will shew what has respectively obtained-

9 The reduction of these different modes has been made in every village to the Measurement of the Maud collam Chay; as what was best understood in the Country- I have in that Talook shewn the Villages that are affected by it, and given the Contents of the Chay in English Measurement in the Statement, in which the different proportions of Measurement are shewn-

...de B Statement

Col 1 in B

10 The average value of the lands thus settled is not high, the proporti-

onate

-nate of Buttai varies according to the situation of the lands and of the number of crops in the year - but according to the information of both mautamcaurs and Curnums in not any respect whatever exceeding either to the Sirkar or Ryot the rate ℘ Cent of Income noticed in my former Report

Vide Para 9 Report 28th July.

11. - - - - The variety of measurement has given great labour to my Cacharee but I hope the abstract Statement of it as reduced will fully elucidate the whole to your Board - from the reduction it appears that one Maudcollam Chay contains in Madras Measurement Cawny 1 Grounds 18 feet 66 Inch 8 and that value of this quantity of land which as the Maudcollum Chay gives Ch 5 -

Vide B Statement

Co. 25

8^{f} $5\frac{1}{2}^{a}$ is on the Madras Cawny C Ch: 3 3^{f} $5\frac{1}{10}^{a}$ or Star Pagodas 2 ^{f} 64^{c} and that the General average which ℘ Chay is 4^{Ch} 4^{f} $1\frac{1}{10}^{a}$ is per Cawney Star Pagodas 1. 22^{f} 5^{c} —

vide G. Total Co. 25

12 . . . . The talook of Anioor in its average assessment of Nunjee appears highter than any other. But its rate, when compared with the Surveyed talooks of Dindegul adjoining it, viz. Sundioor, varies only three fanams ℘ Chay; an increase, which the quality of the land appears to warrant, independant of its being made according to prescription, and rather less in the total, than what Mamool has usually retained as the Rent.

vide Co. 25

13 The average rate of settlement

Vide Co. 31 — ment on the Pooryee lands is, in Comparison of each talook, with the other, apparently very unequal. In Maudcollum Talook, however, there are very little Pooryee lands of Value. as the Dehwar Statement will exhibit.

Vide Co. 31 in Maudcollum Dehwar Statement

14 In the Perimungalum talook the average rate of Rent appears very high. but the reason is, that (with very few exceptions) the land of this talook chiefly under Cultivation is the Cotton Ground which is the most valuable. the Village of Tachgoody appears in the Dehwar Statements rated at 24 fanams of Dindigul Goonta on the Cultivation, which is its proportion to the Mamooli Goonta of the Village. the land rated is

Vide 31st in Perimungalam Dehwar

42 60

is of the best quality, and the rent is only that, which both the Curnums and Nautemcars alledged to have been paid for the respective lands in preceding years without difficulty

15. In opposition to this high rated Village your Board will observe the rate on Marawancollum to be as infinitely low as the other appears high, its rate being f. 8 a/10 The lands of this Village are of the worst description of quality of Salt and Sand soils, and they are ploughed solely by Yerawaddies or people not belonging to the Village, (which is without houses, and retains only the Name) but to the Villages near Marwancollum –

Vide N 59 Termungul Dehwar & Statement

16 The rate of lands

in

Vide Co^e 21 in the Anioor Talook is apparently high, but it is the Rent that has obtained and the quality of the land warrants it — the highest rate in the Poonjee is ten fanams and the lowest about three - the Garden lands are rated at twenty fanams ꝑ Goonta, but there are so few, as to make very little difference on the General average value.

Co^e 21 17. The lands of 17 Villages in Sholanadan, rated under those of Anioor, were a part of Teremungle talook added to what was the Sholandan talook on account of their vicinity to Anioor, and also on account of the Villages being inhabited and Cultivated by the Collaries — they partake in every

respect

respect with the Goodness of the Peromunglum lands, and have been rated in propor=tion-

18 The great difference in the reputed Measurement of the Poorjee Villages is shewn, as for the Nunjee, in the appendix. And altho every means in my power have been used to get at the truth, it is clear to me that what has been given by the Nautamcaurs and Curnums, as the Mamooli Measurement of their respective Villages, is scarcely half the real contents of each respectively-

Vide C Statement

19 - - - - And this has occurred to me from the Consideration of the Madura Rents of the reduced Goonta

of

of ground in that District with the

Dindigul fixed Goonta of equal quali-

-ty which in the former would appear

to give near 50 ⅌Cent advance on the

General Teerva of the latter when assimu

lating to itself the same Measurement

this on the face of things must be

impossible because that advance unless

there was land to answer it must ban-

krupt the possessors and complaints would

come before me whereas none as yet have

come and hence I argue that if the

Teerva be grater in proportion to the

Teerva of the Dindegul fixed Goonta

the Measurement from whence the Ma

dera reduced Goonta was made must

be greater and more than what the

nautemcaurs

Nautamcaurs and Curnums have shewn it to be.

20 This comparison and inference may be better understood by reference to the Dehwar Statement of Vadasundoor talook in the Village of × Peetalaputty which is chiefly of the best quality of land or Kersheb and comparing its rate of Teerva with that of Shengapaddy of Teroomunglum which is also reported of the same quality the Value of the rate of Teerva on the latter is 57 ℘Cent increase on the former according to the present accounts.

× N 14 in Vadasundoor M

vide 43 in Teroomungle Dehwar Statement.

21 This increase could not exist on the equally measured Goonta the difference thus in the Madura Goonta being more

more must compensate the encrease of
Cent the Nautamcar says that the Carnatic
Goonta (the same exactly as the one used
in Dindegul) was used in the Madura
Country until usoff Cawns successor Mahomed
Abrar Cawn placed Shashegherry Iyen
as the Renter of Teromungle talook who
made a new measure called the Topau
Baum.

22 . This Baum was an incre
ase of the contents of the ancient Stan
dard nearly 70 ₽ Cent and on this the
present Iyacut account is said to be
founded this brings the value of the lands
more an equality and when what is
denominated the Dherm Baum is
added to the aforementioned increase it
it

is apparently less rated than the lands of Dindegul.

23 The Dherm Baum means a favored or Charitable measurement not to take the exact measure but to give a portion extra to the Ryot this gift on the ancient Standard from the Villagers information is an increase of about 14 ₽ Cent which added to the former increase of the Topaul Baum makes it to be 34 ₽ Cent in to to on the ancient usage measure of the Teromungle Country.

24 Hence it is fair to infer that the Compensation in land for the increase of Teerva is more than in proportion favorable to the Ryot and

that

that the comparisons on the Villages exhibited proves the Tremungle [illegible] more favorable to the ryot than the Cundigil Assessment on the fixed Measured Goonta-

Vide C 25 The Statement of the Variations of the Poonjee measurement exhibits the reduction of those variations into the Number of Square Baums each Baum giving as its own contents forty feet English, nine anas of an inch and $5\frac{3}{16}$ of an ana - thus the Taur

Vide C or N1 of 3777 . $14\frac{10}{16}$ Baum according to English measurement gives 151300 English square feet (which equals after reducing the English feet to the

Country

Country feet giving ten Inches and 7½ anas English as the true measure of the Country feet / 173400 being the Contents of what is denominated in that Village one Taur of Land.

26 — The measurement thus reduced into Baums is again reduced from the Baums to the Dindigul Goonta 625 Square Baums English measure equalize that measurement — hence in Maudcollam N1 by the Dehwar Accounts appear according to the Curnums and Nautamcars 12 3/4 Taur making Dindigul Goonta 77-1 1¼ each Taur equaling near 6 Gunta 11 Ch 7/16 according to the preceding measurement per Baum.

Vide G
vide Dehwar acct
N1 Maudcollum

27 This process of calculation applied

applies to every discription and variation of Measurement in use in the different talooks according to the Statement and I hope will prove to your Board that I have not spared labor to find the value of the Charge entrusted to me -

Vide Coᵉ 26 28 Under the hed Sornadyem nothing new is included, the usual taxes of Shops, houses, Looms, Topes &c, being alone Comprehended -

Vide Coᵉ 40 29 The head Sibbendy Shews the deduction of those who are employed as the Nautamcaurse and Curnums of the Fort of Madura on the various casts &c and for the Collection of the variety of taxes on the people residing within the Town of Madura there was not

any

any Maunium of land for these people and I therefore made the deduction of 5 ℘ Cent as well to Compensate their trouble as to insure regularity among the Casts within the City the same reason also applies to Teromungalum in every respect.

Vide Co^e 43

30 The head of Chuttrum relates to Villages as ℘ Margin and includes only what has been entered by mistake as belonging to the Sirkar the Villages to which these Sums attach paying a quit Rent to the Sirkar or being totally free from it their Ryacut was entered in the Sirkar Summa hence all proceeds save the quit Rent already entered

Vide N 65 in Maund collum Dehwar Statement
Sholandaum with maundcollum 31-32
Vide Termungalo Dehwar from N° 63 to 83 inclusive
Dehwar Porumboor from N 97 to 102 inclusive
Melloor Dehwar from N 27 to 32 inclusive
Anivor Dehwar from N 47 to 54 inclusive

entered in the Summa revert to the proprietors and this deduction appears in account.

Col. 46 31 The head Aurdamanyem relates to Villages in the Maudcallum and Teromungul Talooks which pay as Enaum quit rent, half the proceeds on their Summa to the Sirkar their Tyacut also was entered in the Sirkar Summa and the proper deduction now made reverts as their half to the Enaumdars.

Vide Dehwar
Maudacallum No. 19
Teromungle — No. 59.

Col. 46. 32 On Examination of what appears as the proper deduction in this Account for the Enaumdars it will be seen that in the Dehwar account more accrues to the Sirkar Summa than

than to the Enaumdars this difference however arises from no demenuation of their income but from the addetion of the Coller Cawelly to what is the Sirkar due.

Vide Cl 52

33 These deductions made the remainder is what has been entered as the Sirkar due and as what has been sent your Board as the land Rent exclusively arising to the Sirkar from the Madura district Viz Cully Chucrums 137891. 2. 15 or Star Pagodas. 83570. 19. 71 unconnected with any other branch of Revenue whatever.

Cr report Jany. 28th

34 This assessment on the land revenue with its increase and decrease on the different talooks has been brought before your Board It is therefore unnecessary to intrude farther on this Subject than to

port 27th Jany

comparative ment

to observe that the Comparation was on the renters reported Cowle to the Ryots not on the former Sirkar Cowle to the Renter had it been so exhibited the increase would have been proportionally more-

Vide D

Vide Col 2 and 4

35 I have drawn out an abstract Statement of the decrease of the Syer in the Madura Province the deductions from the Syer and addetion to the Village Sornardyem arose from the propriety of those deductions being so classed and the deductions from the Sornardyem and addetion of them to the Syer were for the same reason the decrease relates entirely to the abolition of the arbitrary and really grievous impositions of the Nabobs amils and Renter's on the Country

Col 8 and 9

as

as well as to the General exemption of the duties on grain both of them measures most beneficial to the Country and properly alleviating to the Inhabitants-

Vide **E**

36 In the Settlement for the Madura Pollams I followed the same mode of assessment, as for the Sirkar lands, save that the rates of Teerva are generally less than on the Sirkar Villages

Vide Co^e 1-2-3 4-
Vide letter to Board Aug 10th, Feby 21st 1801-

I observed the Principle I laid down for the Western Poligars and after the deductions made on that mode, the remainder became the rent to the Sirkar—

Vide Co^e 5

Vide **F**
Comparative Statement

37 This Rent on the former Peshcush bears an increase of 74½ ℘ Cent in the aggregate. The Pollams are very improveable and if the present peace

of

of the South should continue, I hope the change of habits in the Inhabitants will yearly exhibit the improved, and improving State of the Country

Vide C 38 The Comparative Statement exhibits the Total Revenue of Madura for 1210 and 1211 fusly years according to the renters or Managars accounts & according to the present Settlement the apparent increase has been noted on - but the real increase appears more fully explained in my former Report on this subject, which in the present detail I hope will be satisfactory to your Board -

Vide C Statement in Report 27th Jany

39 I have little to say on the General State of the Country: but that little appears to promise good. The Ryots are

50

are every where returning to habits of industry
The colleries have certainly been more quiet,
than before, since the days of Usoff Cawn. The
Country has improved, is improving, and (I
verily belive) when the Colleries feel the Com
fort of tranquillity, that their predatory habits
will cease. Very trifling indeed have been
the Complaints of aggression, since the possession
of the Country: and their General conduct,
from the Cowles for Cultivation they have
asked for and obtained, gives according to
present appearances fair hopes of well direc
ted industry from these hitherto insubordi-
nate people.

20/7/02 (Signed) F B Hurdis
